

## TURMIX / KOENIG / BOSH / SIEMENS / STRATOS

- Check that 'Energy Saving' is displayed, otherwise press 6
- Put the machine in test mode:
  - Keeping 2 and 3 pressed at the same time, also press 6
- Press 1 and check that the gear motor rotates anticlockwise, then check the limit switch, making sure that the number 1 keeps lit in top of the display

- Press 2 and check that the gear motor rotates clockwise, then check the limit switch, making sure that the number 2 keeps lit in the top of the display

- Also check that the gear motor is not noisy during rotation
  - Press 3 and check that the coffee grinder is working properly, making sure that it is rotating clockwise and that it is not noisy
  - Press 4 and check that the coffee dosing unit is open
  - While keeping 5 pressed, also press 2 and check the absorption in the boiler
  - Open the tap and press 1 and 6 at the same time, making sure that the pump starts up and the impulses from the turbine reach about 40 on the display
  - Close the tap and keep pressed 1 and 6, thereby pressurizing the circuit. Make a visual check inside the machine to make sure there are no leaks and that the impulses from the turbine go down to 0 on the display
  - Check all microswitches:
    - ✓ Turn the arm on the steam knob, making sure that the micro engages halfway round and that the number 4 is displayed.
    - ✓ Activate the group detecting micro and check that the no. 6 is displayed
    - ✓ Take the dump box out and check that the no. 5 disappears from the display
    - ✓ Activate the micro dosing unit and check that the no. 3 is displayed
    - ✓ Check that the no. 7 (Read water) is displayed
- Turn the machine off and on again.
